

the V range

Vestigo

'...to track'

Vestigo is the **Crystal Ball** entry level GPS vehicle tracking system. Customers can access **Crystal Ball**, anywhere in the world, at any time, allowing them to track and report live on their fleet. What makes the **V** range product suite really special and unique is that the system, unlike many others, does not require any proprietary software to be downloaded. It is a true live web based vehicle tracking system.

Vestigo features live online tracking, journey status indicators, current and historical day logs, scheduled email reports, flexible admin rights, alarms, and includes five user licences. Couple all those top end features with a highly detailed, yet easy to use reporting structure, and you begin to see exactly why Vestigo is such a versatile and powerful business tool.

The Merlin 700 GPS tracking device forms an integral part of the system, and is fitted professionally by our specialist engineers on site or at a suitable convenient location to minimise downtime.

Full training is provided to ensure that each user gains maximum benefit from the system, in addition, a comprehensive 'help section' is viewable on the system.

merlin 700

From just £8 per month, Vestigo is a viable and extremely functional business tool that can take your business to the next level and enable your company to take those vital business decisions faster— with the knowledge to back them up.

Crystal Ball tracking systems help businesses to increase productivity and profitability.
