

# the V range

## inVestigo

*'...to investigate'*

InVestigo is the **Crystal Ball** mid level GPS vehicle tracking system that can be accessed anywhere in the world via a PC, laptop or web enabled mobile phone — allowing you to track and report live on fleet operations.

What makes the **V** range product suite really special and unique is that the system, unlike many others, does not require any proprietary software to be downloaded. It is a true live web based GPS tracking system.

InVestigo features live online tracking, geofencing, journey status indicators, current and historical day logs, scheduled email reports, flexible admin rights, alarms, and includes ten user licences. Couple all those top end features with a comprehensive easy to use reporting structure, and you begin to see exactly why inVestigo is such a versatile and powerful business tool.

The Merlin 700 GPS vehicle tracking device forms an integral part of the system, and is fitted professionally by our specialist engineers on site or at a suitable convenient location to minimise downtime.

Full training is provided to ensure that each user gains maximum benefit from the system, and in addition, a comprehensive 'help section' is viewable on the system.

### merlin 700

From just £11 per month, inVestigo is a viable and extremely functional business tool. The system can take your business to the next level and one that enables your company to take those vital business decisions faster, and with the knowledge to back them up.

**Crystal Ball** tracking systems help businesses to increase productivity and profitability.
